

## Erratum

In the March 2002 issue of the *Journal*, the article “Homozygous Defects in *LMNA*, Encoding Lamin A/C Nuclear-Envelope Proteins, Cause Autosomal Recessive Axonal Neuropathy in Human (Charcot-Marie-Tooth Disorder Type 2) and Mouse,” by De Sandre-Giovannoli et al. (70:726–736), contained the following three errors: (1) on the title page (p. 726), the affiliation of Colin L. Stewart should be “6” (Cancer and Developmental Bi-

ology Laboratory, National Cancer Institute–Frederick, Frederick, MD); (2) at the end of the 1st line in the right-hand column on page 730, “AD10” should be “A $\Delta$ 10” (i.e., uppercase Greek delta); and (3) in the 13th line in the right-hand column on page 733, “patients aged 12–52 years” should be “patients aged 12–32 years.” The authors regret these errors.
